

# Dosage Herbi's All Natural 4-4-4 / 2-8-4

## Mix the medium

- Take a big container and fill in your growing mix (soil/coco/peat moss/compost/worm castings/perlite etc.) and mix everything thoroughly.
- Use 1 cup\* of Herbi's All Natural 4-4-4 and/or 2-8-4 per 20l of medium
- Depending on which stage of life the plants going into the medium are in, you can use only the 4-4-4 or a mixture of 4-4-4/2-8-4 (ex. Vegetation 70/30 – 4-4-4/2-8-4; Start of flower 50/50; Flowering 30/70 – 4-4-4/2-8-4)
- Mix the nutrients into the medium until their thoroughly combined and the medium is amended and ready for planting

## Top Dressing

- Use 1/2 cup\* of Herbi's All Natural 4-4-4 and/or 2-8-4 per 20l of medium. The first topdressing should be done just after transplanting
- Depending on the stage of life the plant you're top dressing, you can use different ratios of the 4-4-4 & 2-8-4 (Vegetation 70/30; Start of flower 50/50; Flower 30/70)
- "Massage" the nutrients into the medium on the top of the pot. (Microbes and Fungi are UV light sensitive). Ideally cover the soil with mulch (wood chips, straw etc.).
- Water plants immediately after topdressing
- Top Dressing is recommended every 2-3 weeks, starting on day 1
- Ideally use Herbi's BREW to set up a compost tea and apply the diluted tea every 1-2 weeks.

\*If you use a plain coco, perlite, compost and worm castings mix without any other amendments please double the amounts
